

Secure the Future of the Grid

Sensor Systems Operations Manager

Remote or Somerville MA. Full-Time

We are a rapidly growing technology company, helping our utility partners around the world lead the energy transition by enabling enhanced grid flexibility, resilience, and security. At LineVision, we provide electric utilities with our patented non-contact sensors to provide the real-time monitoring and predictive analytics needed to secure the future of the grid.

We are looking for a **Sensor Systems Operations Manager** to play a key role in our organization to help improve the reliability of our network of sensor systems.

What will you do?

You will have primary responsibility for monitoring the health of all sensor systems deployed. You will also be responsible for triaging and leading the resolution of the sensor outages in addition to providing back office support to the Field Operations team.

What do you need to succeed in this role?

- Demonstrated ability to:
 - Use and learn specialized software applications.
 - Consolidate information from a variety of sources to accurately validate, analyze and report any device or data outage.
 - Make sound decisions in stressful situations.
- Prior experience in monitoring a network of devices that operate in real time. Ability to interpret data and take appropriate actions from that data.
- Exceptional attention to detail.
- Data entry skills and basic database management. Basic Python skills preferred.
- Regular availability to support emergency operations and installations outside normal business hours.
- Prior experience in working in cross functional team settings, including with Software Development and Engineering groups.

What does joining LineVision mean for you?

- **Impact.** Your talent, time, and energy will critically impact our success in providing utilities around the world with solutions to increase the flexibility, efficiency and safety of their grids for a cleaner and electrified future

- **Growth.** Learn how IoT ecosystems are applied and operated as a grid enhancing technology.
- **Distinction.** You will inspire the future by being part of a team that introduces a fundamentally differentiated solution to utilities that helps solve the challenges they face in updating and increasing the capacity of the current grid system.
- **Ownership.** You hold broad responsibilities with high autonomy in a communicative, collaborative, and fast-paced environment.
- **Compensation.** You are vested in a high-potential success story, with competitive compensation, benefits, and comprehensive PTO and leave policies, complemented by stock options in a high-growth company with world-class venture capital backing.

Who we are...

- We are a team of dedicated individuals who are passionate about helping to solve the biggest challenges facing today's electric grid.
- We believe unlocking transmission capacity is critical to the resilience of our future grid and the ability to integrate renewables at scale.
- We value and benefit from the wide-ranging perspectives that come from a diverse and inclusive work environment.
- We are committed to providing:
 - Situational awareness to help grid operators make informed decisions on the physical position of their conductors that can help to prevent damage and fires.
 - Dynamic Line Ratings to increase capacity by up to 40% on existing transmission lines with real-time monitoring while improving reliability & safety.
 - Asset health monitoring to improve maintenance strategies by creating a digital twin to determine the true conductor health.
